DETAILED ACTION

Oath/Declaration

The declaration is acceptable.

IDS

The IDS has not been considered because the list of prior art is missing. The copy of the list of prior art should be re-supplied.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 112

Claim 1-~~2~~ are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, it is unclear what the "type" on line 1 is.

In claim 2, it is unclear what the "threshold voltage losses" are and where they come from.

In claim 3, it is unclear what the "subset of stages" are and where they come from.

Art Unit: 2816

In claim 12, it is unclear what the “given stage”, “injection capacitor” and “control capacitor” are and how they can be determined on the drawings.

In claim 8, it is unclear how the recitation “charge transfer transistor” and “controlling transistor” is read on the preferred embodiment. Insofar as understood, no such means can be determined on the drawings.

The remaining claims are dependent from the above claims and therefore also considered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 USC102 (b) as being anticipated by Kawai (US Pat. 6,198,342).

Figure 15B of Kawai discloses a charge pump circuit comprising charge pump stages (1-3), a first clock signal (CLK2-CLK4) and a second clock signal (CLK1-CLK3).
